Fault condition test	- Power source - Fault condition test - IEC 61347-1	ETF5-OSM/LUM	2020 CTL Plenary Meeting
Question			
<p>What kind of power source is to be used when performing the fault condition test for the standards IEC 62560 and IEC 62776 to obtain reproducible and comparable test results in the CB scheme?</p>			
Decision			
<p>For the fault condition tests of IEC 62560 and IEC 62776, the same power source as for clause 14 of IEC 61347-1:2015+A1:2017 is to be used.</p>
